Nicotine Precursor Matter

Dear Jim:

It was a pleasure meeting on November 3rd with you, Frank and the scientists involved in the nicotine precursor project.

As promised, we enclose copies of several biotechnology patents and published patent applications whose examples exemplify the degree of detail we would like the inventors to emulate in writing up experimental protocols and results to be included in this patent application. As we discussed at the meeting, any doubt on the inventors' part as to whether a particular experimental detail ought to be included should be resolved in favor of inclusion.
